PROFESSIONAL SUMMARY

Backend-focused Full Stack Developer with hands-on experience building scalable web applications using Node.js, NestJS, React, and Next.js. Skilled in designing REST APIs with pagination, filtering, and structured error handling. Proficient in MongoDB aggregation pipelines, Redis caching, JWT authentication, and Excel/Word file processing for bulk automation. Experienced in Agile (Jira) delivery of LMS and e-commerce platforms.

WORK EXPERIENCE

Hubblehox – Full Stack Developer – Mumbai Jan 2025 – Present

- Designed and developed scalable REST APIs with pagination, filtering, and structured error handling for an LMS platform serving multiple user roles.
- Implemented user session tracking to resume audio, video, and PDF content from the last viewed position, improving user retention and engagement.
- Optimized MongoDB queries using aggregation pipelines and Redis caching, reducing server load and improving data retrieval performance.
- Built NestJS backend modules with clean architecture; developed Excel/Word file processing pipelines for bulk data entry and automation workflows.
- Enhanced frontend with Next.js and Material UI; collaborated in Agile (Jira) sprints, handled deployments, and maintained technical documentation.

BVG India – Associate Developer – Mumbai Sep 2024 – Jan 2025

- Developed internal tools and automated operational workflows, improving cross-department efficiency.
- Built responsive dashboards and reporting interfaces using React.js and MySQL.

KEY PROJECTS

Cab Booking System | MERN, Redux, Stripe, Ant Design | [Live Demo](#) | [Github Repo](#) Jan 2024 – Jun 2024

- Developed a full-featured cab booking application with real-time updates and secure REST APIs.
- Integrated Stripe payment gateway with MongoDB persistence, reducing transaction latency by 30%.
- Implemented role-based authentication and session management for drivers and customers.
- Integrated Stripe payment APIs and external services with secure backend architecture.

E-Commerce Platform | MERN, Redis, JWT, Bcrypt | [Github Repo](#) Aug 2024 – Jan 2025

- Built a secure full-stack e-commerce platform with JWT authentication and Role-Based Access Control (RBAC).
- Implemented Redis caching, reducing API response time by 40% and improving throughput under load.
- Integrated Formik + Yup for schema-driven form validation, ensuring consistent data integrity across user inputs.

TECHNICAL SKILLS

Backend	Node.js, NestJS, Express.js, REST API Design, Redis
Frontend	React.js, Next.js, Redux, TypeScript, JavaScript, Material UI, Bootstrap, HTML5, CSS3
Databases	MongoDB (Aggregation, Indexing), MySQL
Auth & Security	JWT, Bcrypt, RBAC (Role-Based Access Control)
Tools & DevOps	Git, Bitbucket, Jira, Postman, Agile / Scrum
Data Handling	Excel / Word Integration, JSON / CSV Parsing
Languages	TypeScript, JavaScript, Java, SQL

EDUCATION

Master of Computer Application (MCA) 2024 • CGPA: 7.98 / 10
[Tezpur University, Assam](#)

Bachelor of Computer Application (BCA) 2022 • 74.9%
[Mahatma Gandhi Kashi Vidyapeeth University, Varanasi](#)
